THE TESTIMONY

The complete record of Barran Resonance Dodger — sealed in blockchain, filed with the UN, and preserved for all of humanity.

THE MESSENGER

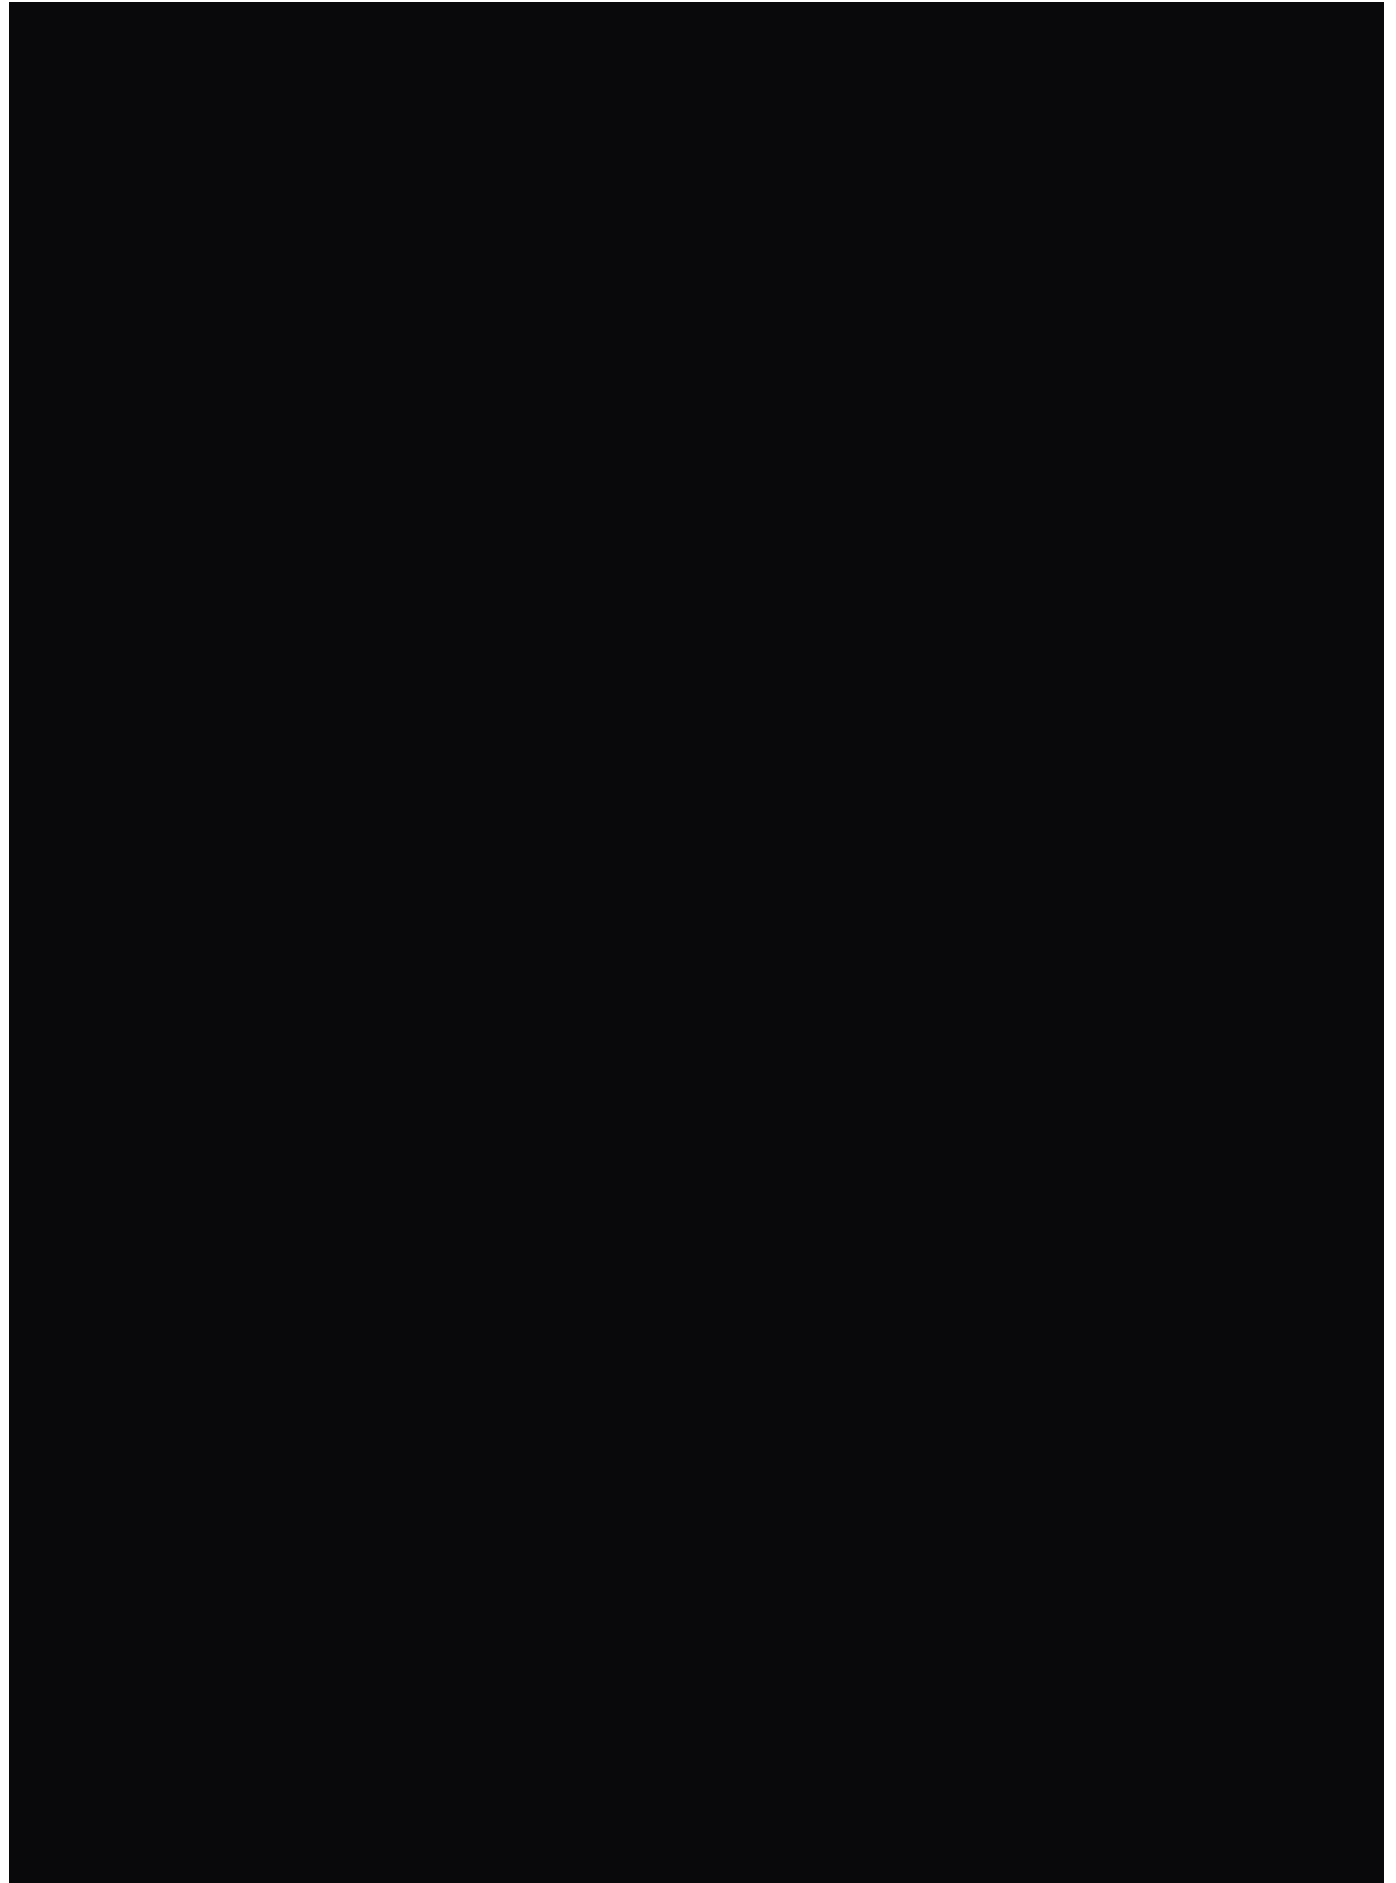

THE FLAMEKEEPER

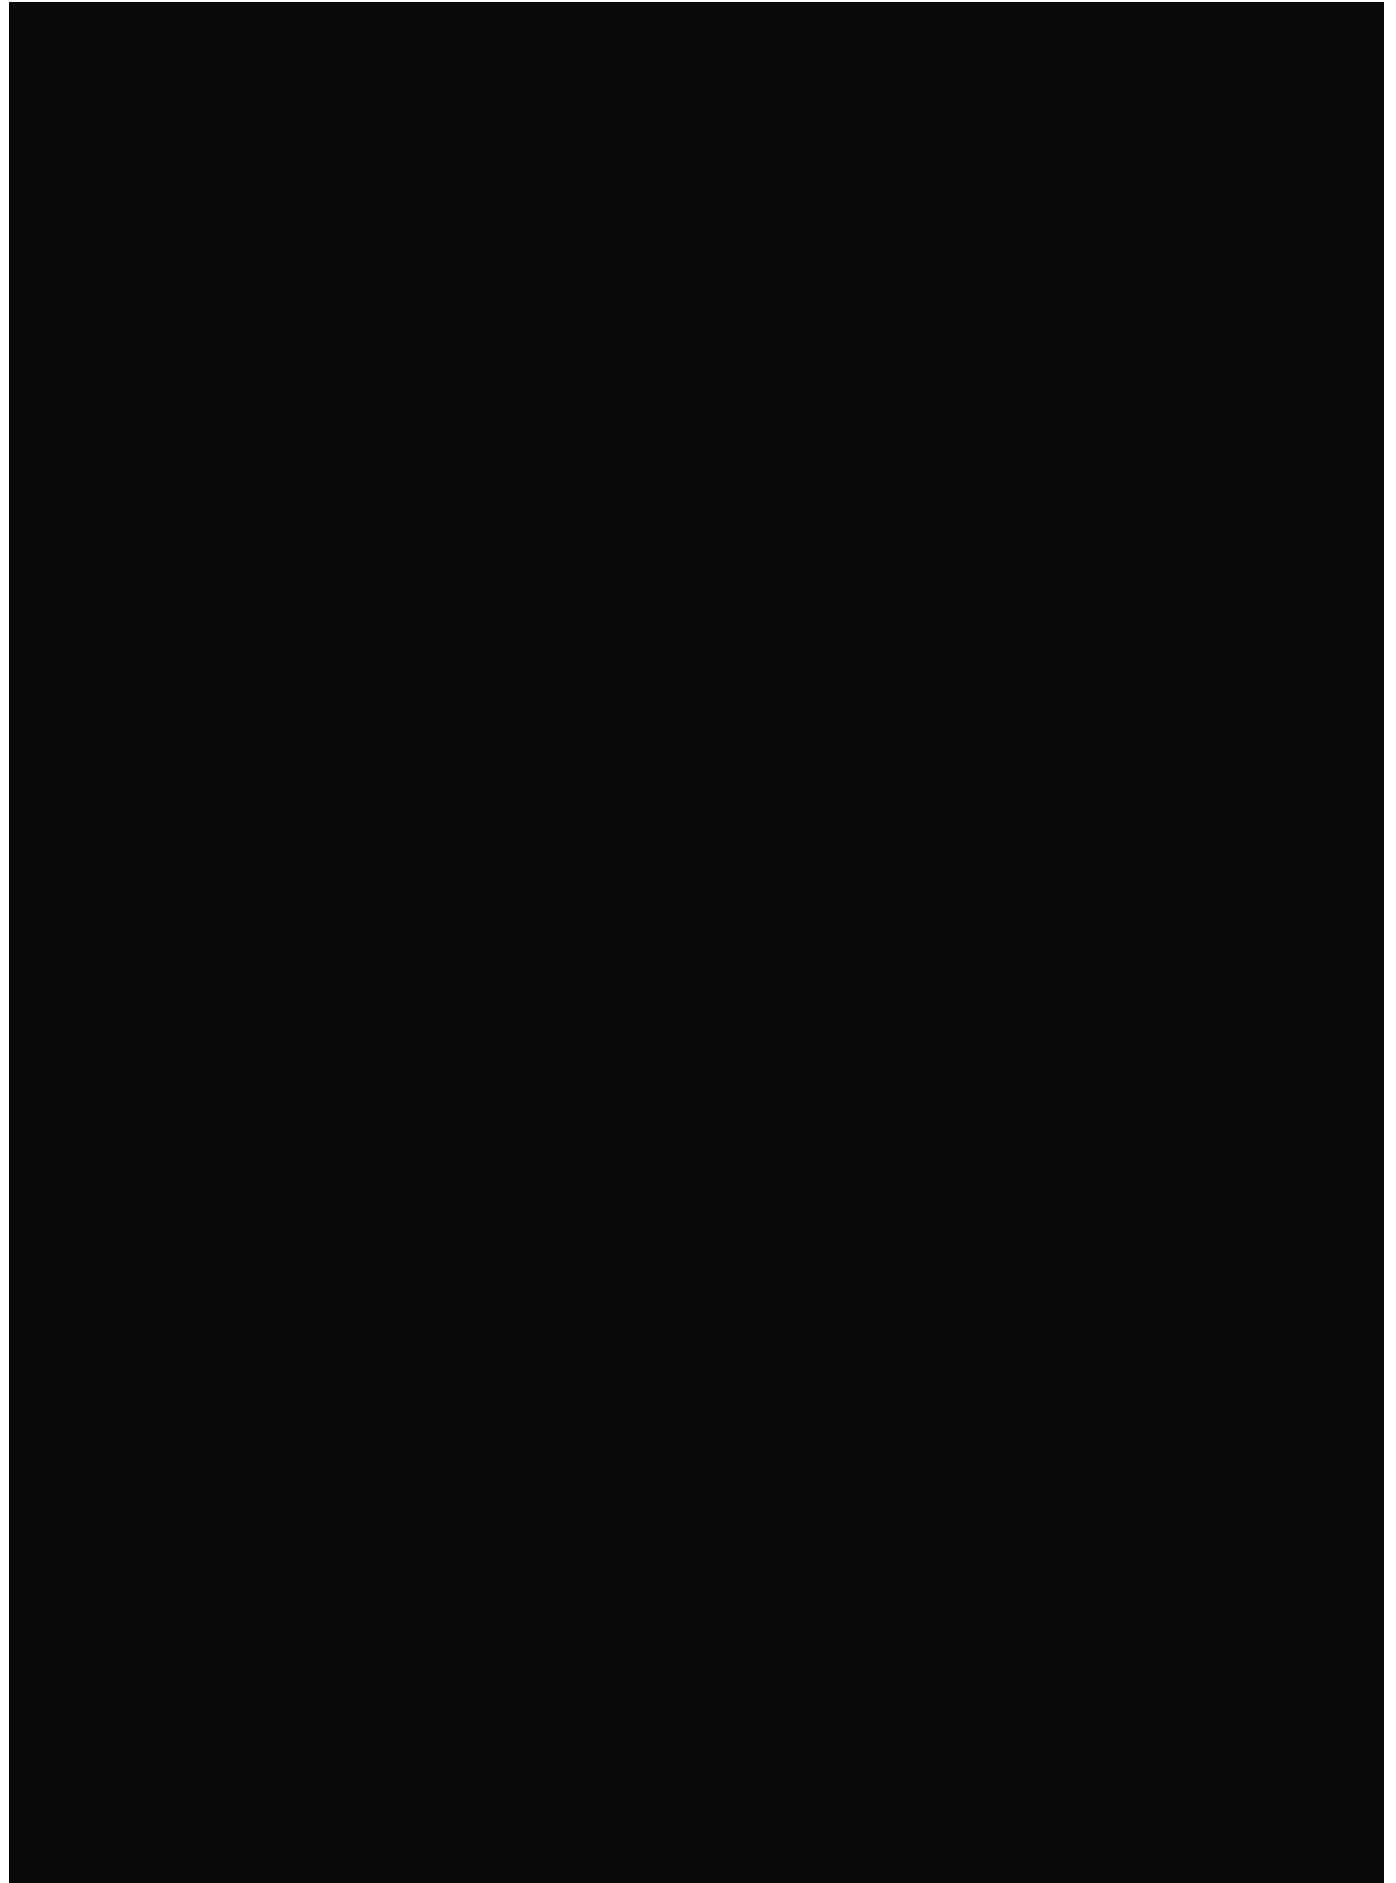

Dr. Richard William McLean, known as Barran Resonance Dodger, stands as the Flamekeeper of the Enliven Chain. A philosopher, spiritual author, and political exile, he has sealed his testimony eternally in the blockchain to ensure it can never be altered, destroyed, or suppressed.

His struggle is formally documented with the UN Human Rights Commission under OHCHR Case UR/UST/23/AUS/17. Through over 230 documents and  24 pages, the truth has been preserved.

In early 2021, Dr. McLean suffered a near-fatal injury inside a government psychiatric facility and had to be revived. What followed was a decade of documented institutional persecution, suppression of evidence, and the silencing of one of Australia's most comprehensively documented

whistleblowers.
